A local Mom shares her story.

A pregnant mother who was early in her third trimester went in for a routine ultrasound. The doctor discovered a very serious condition related to the baby's heart. The situation was such that decisions to take the baby quickly resulting in possible surgery were being discussed. Countless specialists were consulted from near and far and the family was frantic. Days of unrelenting worry took place.

Upon request, Barbara prayed with the pregnant woman asking and trusting in the healing power of Jesus Christ for a safe delivery and healthy baby through the intercession of Mary Immaculate Queen.

Immediately upon the next appointment, there were signs of a positive change related to the baby's condition. There were signs of hope. The doctors cautiously monitored the baby's health for weeks as a potentially dangerous delivery was still a strong possibility. At best, the baby would likely be kept for some time in the neonatal intensive care unit for around the clock heart monitoring.

The due date arrived, and a full-term, healthy strong baby boy was born naturally, and the mother was healthy and unharmed. The doctors were amazed and proclaimed a miracle! (Out of an abundance of caution) the baby stayed just one extra day in the hospital. Upon his six-week check-up, he was declared perfectly healthy. For nothing is impossible with God!

March 2021 from Pauline O'Sullivan Orangeburg, New York:

Barbara, we received our miracle for my mom Evelyn. She had suffered a severe stroke and was in a coma for some time. The prognosis was grim, but the Lord came to her rescue and she escaped major disabilities.

Recently the doctor diagnosed a uterine tumor the size of a grapefruit. He said it was beginning to interfere with her major organs and had to be surgically removed. The family was petrified as they knew she couldn't survive major surgery.

After the prayers for healing and especially the miracle prayer to Mary Immaculate Queen, the next visit to the doctor brought the happy news, no surgery required! We couldn't have hoped for better news.

Plus, a big miracle occurred when you came to New York and prayed over a boy named John who was critically ill with Leukemia. The child made a total recovery and is doing great 10 years later!!!

Mary Immaculate Queen ~ Triumph and Reign!
